

# Manager Project Development

To strengthen our team, we are looking for a Manager Project Development for our location in Hamilton, ON.

## Job responsibility

- Responsible for project managing all aspects of the development of utility scale wind projects.
- Complete projects on time and on budget
- Involved in stakeholder management, site identification, land agreements, selection and screening of sites, environmental assessments, permitting and financial close of wind projects.
- Frequently collaborate with peers including Senior Manager and Director of Project Development, Land Agents, and Senior Executives

## Your Profile

- A degree in a relevant field, engineering, business, planning or environmental studies.
- 3 years or more of project development management experience in the renewable energy sector
- Experience in the development of commercial, industrial, or utility scale renewable energy projects
- Previous experience in land securing (options and leases), permitting and connection processes for renewable energy projects.
- Ability to interpret and summarize local zoning laws, relevant environmental, development, construction, etc. restrictions relating to wind energy development in identified regions throughout Canada.
- Team player with high quality communication and organizational skills
- Comfortable with GIS software
- Capacity to identify and locate appropriate sources of information relating to GIS (including but not limited to shapefiles, kmz files, local zoning laws, relevant legislation, etc.)
- Driver's license

## Our Benefits

- Flexible working time System
- Homeoffice possible
- Participation in the energy transition
- Technical Equipment

## About us

Prowind Inc. ("Prowind") is a renewable energy developer and operator focused on the development of renewable energy projects using wind and solar technologies. With many renewable energy projects currently in operation globally, Prowind has the expertise and experience to successfully develop and operate renewable energy projects around the world. The North American headquarters is in Hamilton, Ontario.

Our company values focus on building lasting relationships within the communities we operate. We look for development opportunities that allow for participation by community members such as ownership, community benefit programs or as customers for the renewable electricity generated.

Please send us your comprehensive application materials, including your **Compensation requirements** and **availability** to Carr Villabroza ([cwillabroza@prowind.com](mailto:cwillabroza@prowind.com)). Please enter "Manager Project Development" as well as your name in the subject line of the e-mail.
